

HOW ECCR CAN HELP YOU

ENVIRONMENTAL COLLABORATION AND CONFLICT RESOLUTION

Environmental Collaboration and Conflict Resolution (ECCR)

ECCR is people with different views and interests working together in a systematic and organized way to find workable solutions to shared problems about environmental issues and public policy.

1. Assess the Issue, Challenge or Conflict

We Help To:

- Identify perspectives
- Identify areas of agreement and disagreement
- Recommend a process to move forward

2. Create a Collaborative Environment

We Help To:

- Develop a collaborative process
- Bring parties together
- Develop shared goals
- Build relationships
- Manage group dynamics

3. Facilitate a Solution

We Help To:

- Foster joint fact-finding
- Generate creative solutions
- Form committed agreements
- Evaluate implementation and support adaptive management

Benefits of ECCR

ECCR includes a suite of tools, techniques, and approaches that help federal agencies and other affected stakeholders **address environmental challenges**. ECCR often enhances project **efficiency**, **reduces costs**, **increases government capacity** to serve citizens, increases the likelihood of **avoiding litigation**, and delivers **better and more durable outcomes**.
